

AI Tribe

AI Tribe

What are we trying to do?

To create a **connected**, outcome-driven approach to **AI across Nationwide and Virgin Money**—ensuring visibility, value realisation, and responsible innovation through a collaborative network of formal leaders and passionate contributors. **We aim to be the central hub for AI** thought leadership, capability development, and strategic alignment—**driving adoption, accelerating delivery, and shaping the future of AI across the account.**

Track & Connect

Track and connect all AI initiatives across the account to ensure visibility, reduce duplication, and surface synergies.

Realise Value

Enable value realisation through a structured yet lightweight governance model that supports delivery and measurement.

Collaborate

Foster collaboration across the Data & AI practice via the AI Tribe—bringing together formal leaders and passionate contributors.

Front Door

Support innovation through a clear front door for new ideas, experimentation, and incubation.

Align Priorities

Align with strategic priorities while accelerating delivery and adoption of AI capabilities across business units.

Thought Leadership

Champion thought leadership by developing and sharing points of view on emerging AI trends, technologies, and ethical considerations.

Learn & Develop

Invest in learning and development through initiatives like brown bags, hands-on labs, and curated content—covering topics such as prompt engineering, Agentic AI, and responsible AI practices.

AI Tribe

What is our short to mid-term plan?

30 days – Foundation and Visibility	60 days – Structure and Content	90 days – Scale and Sustain
Initiate - Identify supporters and influencers across the account - Kick-off call with core team. - Define mission statement and ambition. - Set up and configure collaboration space (Teams/SharePoint). - Create a simple intake mechanism (e.g., mailbox or form). Communicate and Discover - Inform leadership (Cora, Derek, Kay) of the initiative. - Share updates via Life@Teams, LT calls, and newsletters. - Begin mapping AI work across the account (portfolio leads, delivery teams). - Start logging initiatives in the master spreadsheet	Governance and comms - Define comms plan (audience, channels, cadence). - Refine team structure and roles. - Draft Terms of Reference (ToR). - Publish first newsletter. Content and Engagement - Refine SharePoint site with curated content. - Build backlogs: - Thought leadership (e.g., Agentic AI, AI Refinery) - Brown bag sessions - Collate examples of work: - Internal (Accenture) - External (NBS/VM) - Begin agent development to sit on content (e.g., summarisation bot or Q&A agent).	Content Delivery - Publish regular thought leadership (e.g., monthly posts). - Publish regular newsletters. Community Engagement - Launch brown bag sessions. - Host showcase sessions (e.g., Agentic AI, AI Refinery, Property Risk AI). Feedback and Evaluation - Gather feedback from stakeholders. - Refine backlog and roadmap. - Begin planning for next phase (e.g., AI maturity model, capability map).

AI Index

A lightweight framework for measuring our work using AI across the group.

AI Index

A lightweight framework for measuring our impact using AI across our teams

1

People & Adoption

How ready is the team to use AI every day, and are they actually doing so?

Build-to-Value

Are we moving from ideas → PoCs/PoVs → MVPs → production, and is there day-to-day use with value tracked?

3

2

Access & Enablement

Do people have licenses and environments to actually use AI (M365 Copilot, GitHub Copilot, Copilot Studio and more?)

Conversations & Governance

Are we in regular AI conversations with client counterparts, and are those conversations linked to a roadmap and the right governance (e.g., RAI risk screens)

4

AI Tribe Update

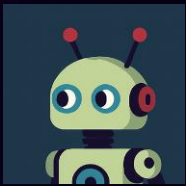

We are creating an outcome-driven approach to AI across Nationwide and Virgin Money. Ensuring visibility, value realisation, and responsible innovation through a collaborative network of formal leaders and passionate contributors.

AI Tribe Roles

Chieftains

Leaders and Vision holders for the AI Tribe.

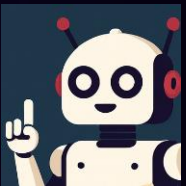

Builders

Engineers and creators of AI solutions.

Scouts

Explorers who surface AI work and insights

Storytellers

Communications, demonstrations and showcase leads.

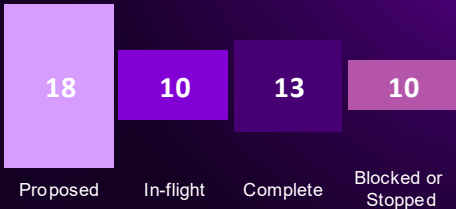

What have we done?

Formed a team, identified key roles started governance.

Developed the AI index to measure our teams and completed the first pass.

Hosted the D&FTD leadership team at Accenture’s innovation centre.

Consolidated over 50 initiatives across the team into a central location.

Next steps

Refine the AI Index and start tracking.

Embed Scouts into the portfolio and establish regular cadence.

Raise the TQ bar for the account.

Host lunch and learn, show and tells for cross pollination of initiatives.

Build “Tribo” – our AI Tribe Bot.

TQ Score 1+
